I Believe "Coding" is an art, different programming languages and scripts are platforms to show your art.

How I can make your project successful?

Almost every application required, Prototype Designer, Application Designer, Application Developer, Application Test code builder, Deployment Engineer, & if application goes well in the market, you might also need An Enterprise Application Architect.

Well, if you already have an application or you want to make an application, I could be helpful for you at all scenarios, because I can make prototypes for your Application, Design & Develop your web, mobile & desktop applications, I can deploy your application, I can write test cases for the application & If your application will have huge traffic, I can make enterprise application diagrams & prototype for you.

Resume

Why hire me?

I am a flexible person, that means, I can complete you any kind of Technical, Programming & Digital Design Task. In case you want to hire me for application development, then I suggest you provide me complete work that means, frontend development as well as backend development because I'm good at both technologies. It will be also easy for me to design complete application architecture from starting of application to the end, frontend to backend.

Platforms

Some technologies & framework, I usually work on

Tapas Thakkar

~ Client - Macey App

Chirag is a dynamic person who combines passion, creativity, hard work, and dedication. He is a model team member with incredible commitment and dedication to team goals. Highly recommended.

Harshil Kotecha

~ Client - Kishan Cooling

I work with chirag in many project he is creative thinker for Angular JS , Node JS technology also he is having enough experience in UI/UX design.

SOME STATEMENTS

(for more, visit my LinkedIn profile)

Rushit Kapadia

Project Manager

at NCryoted Technologies Pvt. Ltd.

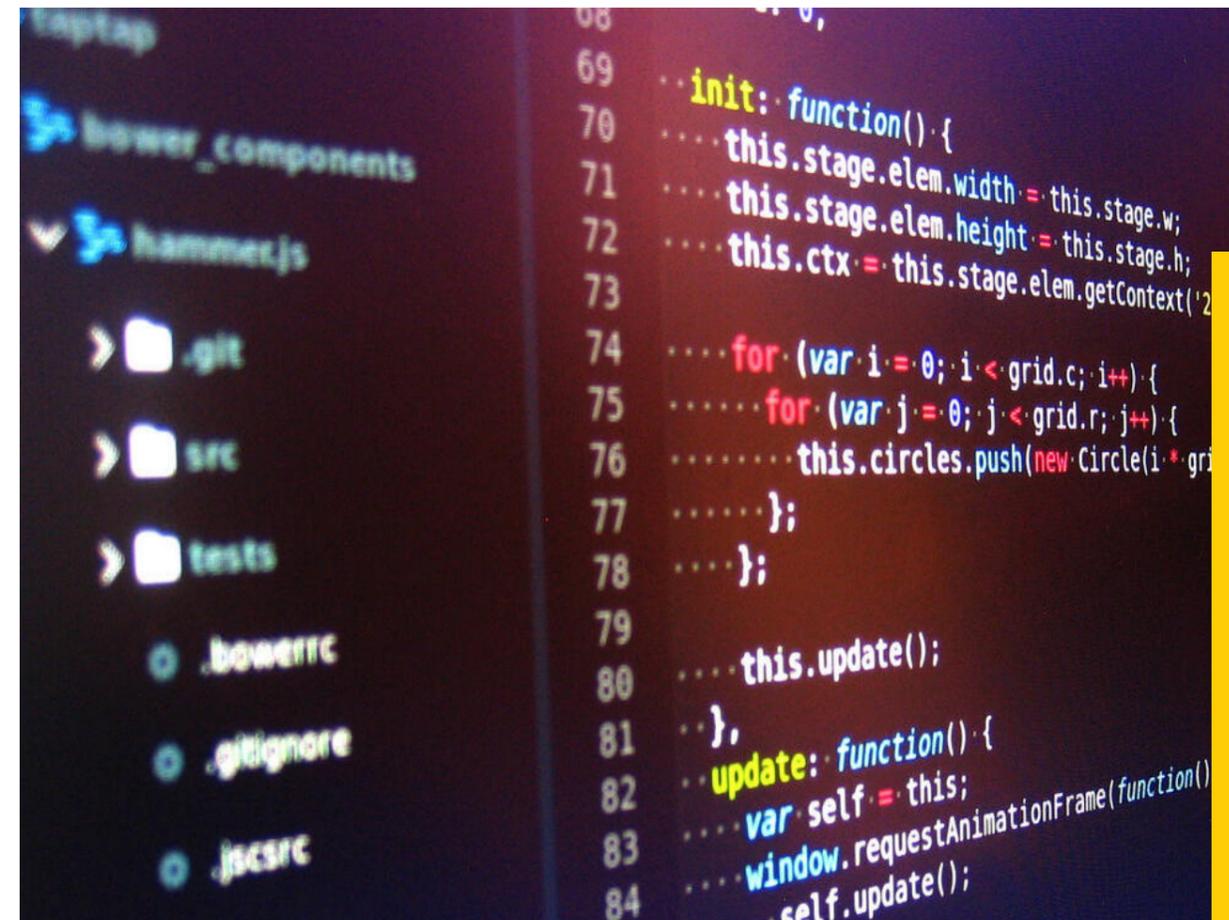

Chirag is one of the most dynamic personality you can have into your project. Be it technical or functional knowledge or his work comes first attitude, makes him one of the most trustworthy person when it comes to complex or important tasks. It's been an honour and pleasure to work with him directly into many projects.

List of Works

I can't share my NDA signed projects here

- 1** / **WiseCrowd**

- 11** / **KishanCooling**
- UrbanClaps Clone - Admin Panel
NodeJS, MongoDB, Angular
- 12** / **Macey**
- Car, Yacht & Home Booking
NodeJS, MongoDB, Angular

Fall in Love with Development

In the technical world, technology often changes. There was a time when the tech world was attracted to Java-based frameworks & technology, due to its portability & multi-platform support. Nowadays Tech market is almost fully covered by JavaScript-based technologies, even some other language platforms like Laravel framework of PHP, use npm & their packages. But, It might be possible in future some other language might take place of JavaScript, like how JavaScript took place of Java. totally possible right? that's why I believe to always walk with time & requirements.

Portfolio - Top Projects

1 WiseCrowd.global PHP Web Developer

Client's name :
**NCrypted Technologies,
Rajkot**

Category :
**Freelancer Job Portal,
(Freelancer Clone)**

Date Published :
December, 2016

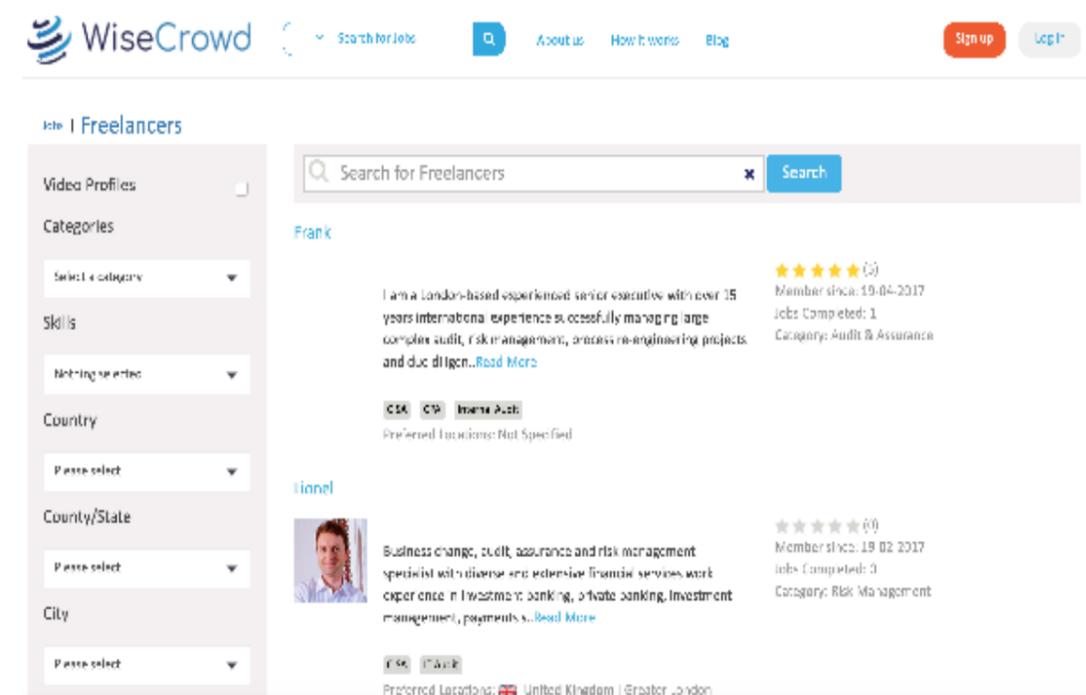

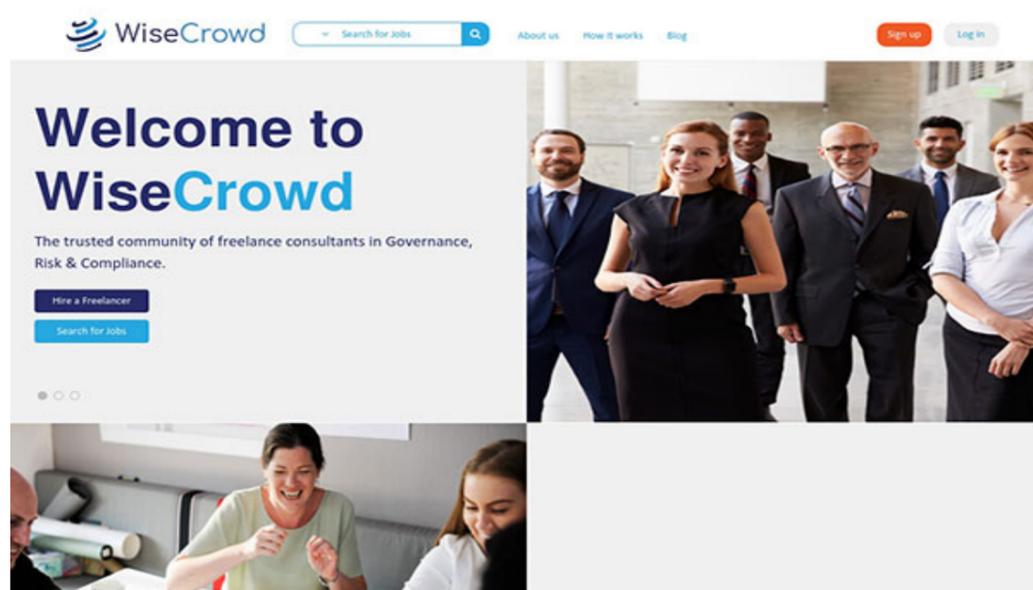

Online :
<https://wisecrowd.global>

Description

I made this application in PHP (custom framework), MySQL & JavaScript. Actually, it was my first big project which was based on the Freelancer website. It's one kind of online Job portal where clients can post their requirements & freelancer offer them. Similarly, the user can hire a freelancer directly by giving him an offer.

This site has extra features like multiple currency support, onsite & remote work set, timesheet & availability calendar management, payment mode like escrow & many more, save search & receive notifications & SMS based on save & many other.

BookNRide

NodeJS - REST API & Admin Panel

Client's name :
NCrypted Technologies, Rajkot

Category :
Taxi Booking Portal, (Uber Clone)

Date Published :
April, 2017

Online :
<https://www.ncrypted.net/booknride>

Description

BookNRide is a product of NCrypted Technologies Pvt. Ltd. It was a customized clone of Uber with some custom features.

kindly checkout link I provided of nrypted's product page where you can find more description on this application. I made complete Backend Application including REST & Admin Panel of this site. you can check out the video on this page. which uses my name as email address "chiraglathiya@ncrypted.com" which is currently deactivated email, after I left the job from nrypted technologies. (as a proof).

How does On Demand Taxi Booking App Work?

BooknRide is an on-demand transportation app like Taxi Booking that works on a simple formula - It allows riders to book a cab by simply tapping the 'book now' button on their Taxi Booking clone App, and get a cab arrive at the desired location, literally on demand.

PARTNER APP

BooknRide Driver application simply focuses on its driver based requirements, is concerned to carry off user details, requests, ride details, navigation details, etc. in the most feasible style.

USER APP

It allows the users to book cabs involving all the factors like destination, time of arrival, location details using this incredible android app for the marvellous experience.

ADMIN DASHBOARD

Focus on your assignment tasks to speed up pleasant business outcomes with the most efficient taxi management services.

BetterYou - Social Wellness

React Native & Redux Thunk

Client's name :
9Stack Softwares

Category :
Wellness - Social Network

Date Published :
November, 2018

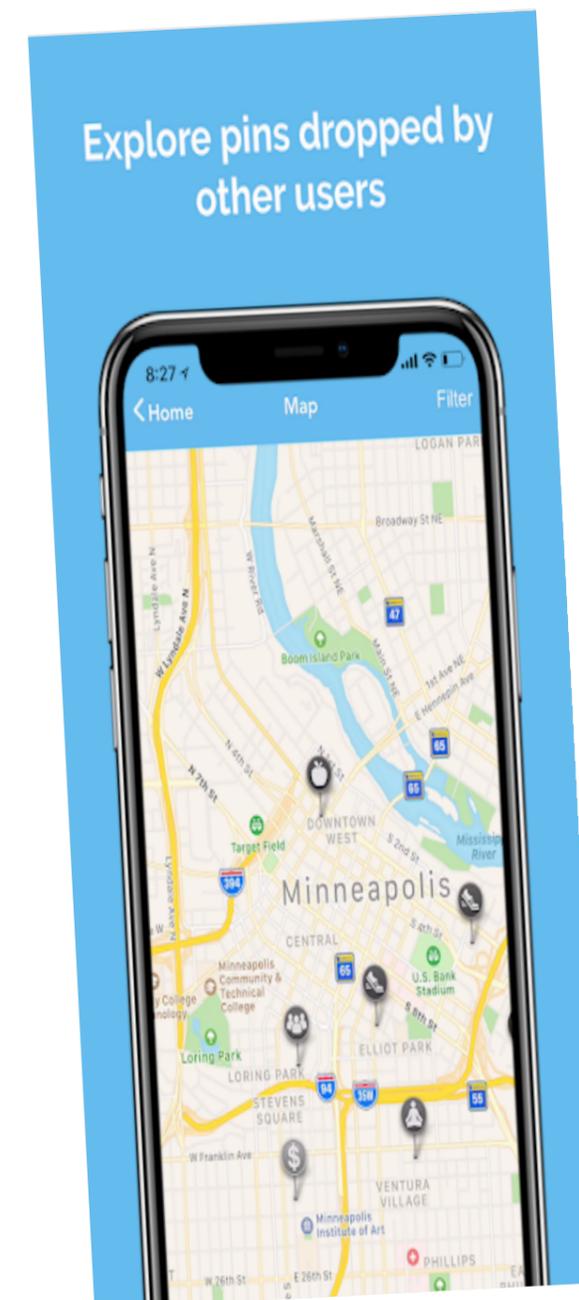

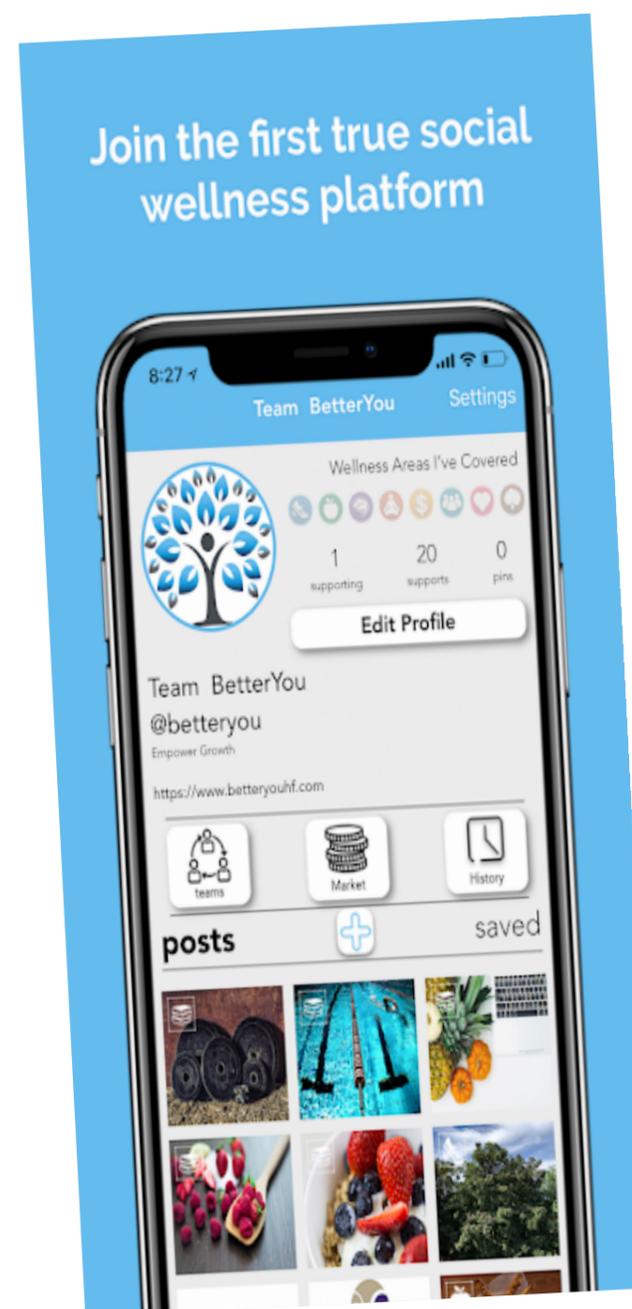

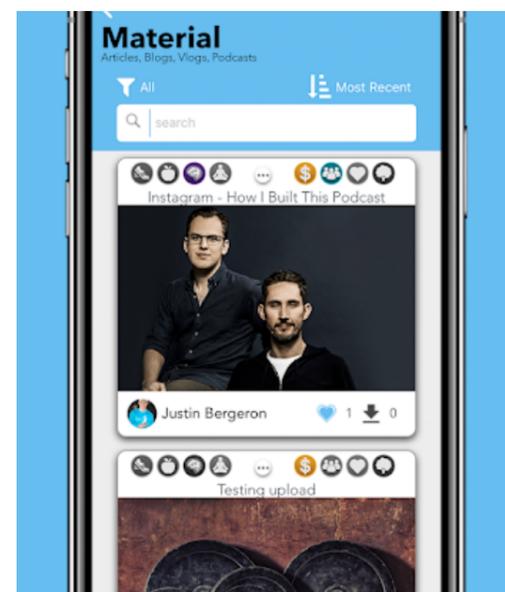

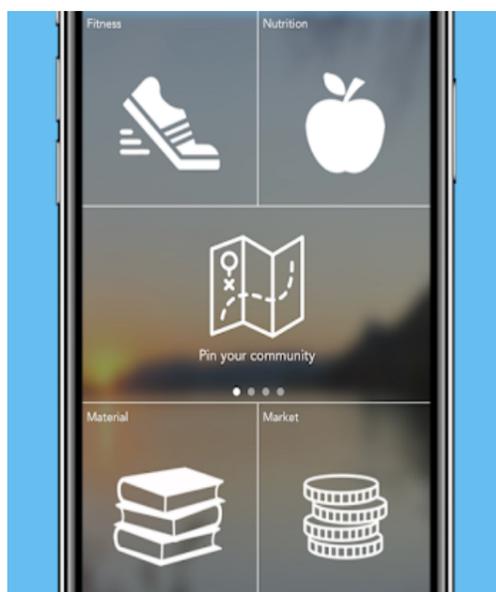

Online :
<https://play.google.com/store/apps/details?id=com.betteryou>

Description

"Better You" is a social network platform where you can share the recipes, exercises, articles, etc. It also provides some discount on visit some health-related material provider store. you can find it on a map. make groups, create events, purchase coupons and many more.

"Better You" was a quite-big application that includes lots of services. it's design is quite similar to IOS's Instagram application.

Portfolio - Top Projects

4 Qrius (formerly The Indian Economist) *React Native & Redux Thunk*

Client's name :
9Stack Softwares

Category :
Online News & Magazine

Date Published :
April, 2019

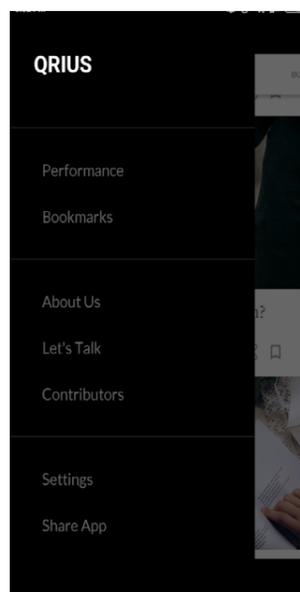

Online :
<https://play.google.com/store/apps/details?id=com.theindianeconomist>

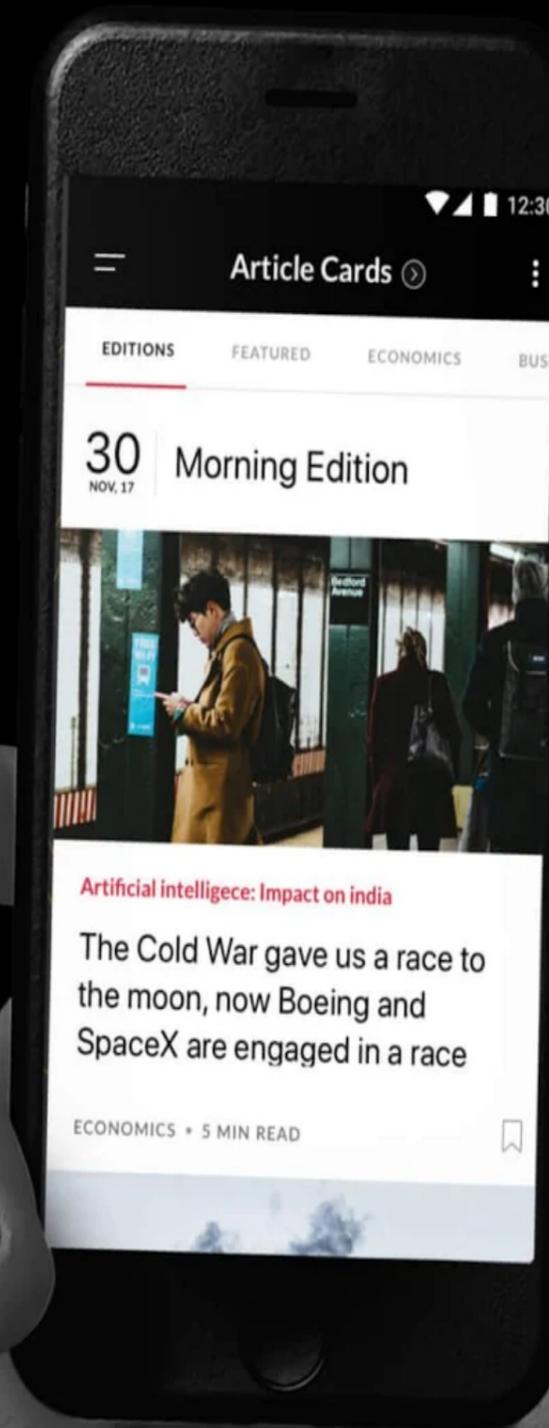

Description

Qrius App was a challenge for me, because it's API was totally come from a Wordpress plugin which was also returning HTML as response now client want a functionality like light-mode & dark-mode & font size regulator so, as challenge I need to parse the HTML into similar UI component in React Native I accept the challenge & complete the task using some plugins & Regular Expressions.

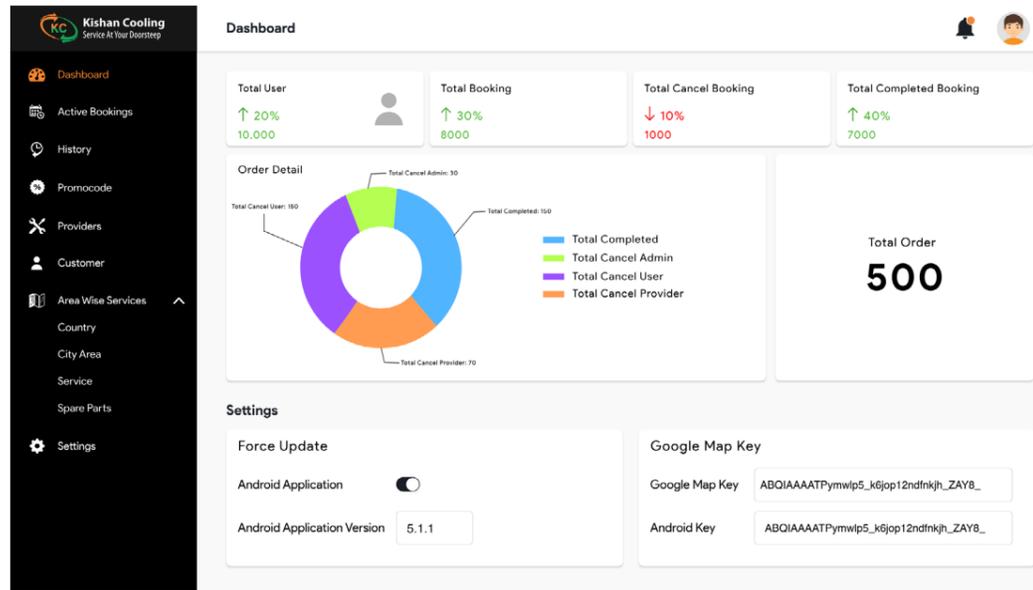

Qrius is an application of really big Indian digital news provider company - The Indian Economist. I complete the task & The client said thank you, with a smiley emoji which was biggest reward for me.

*This Application installed 100,000+ times from Playstore.
Successful business always stand on successful product.
I feel proud that I was one of the part of it.*

Work as freelancer

Project Name :
Kishan Cooling

Category :
UrbanClaps Clone

Online :
N/A

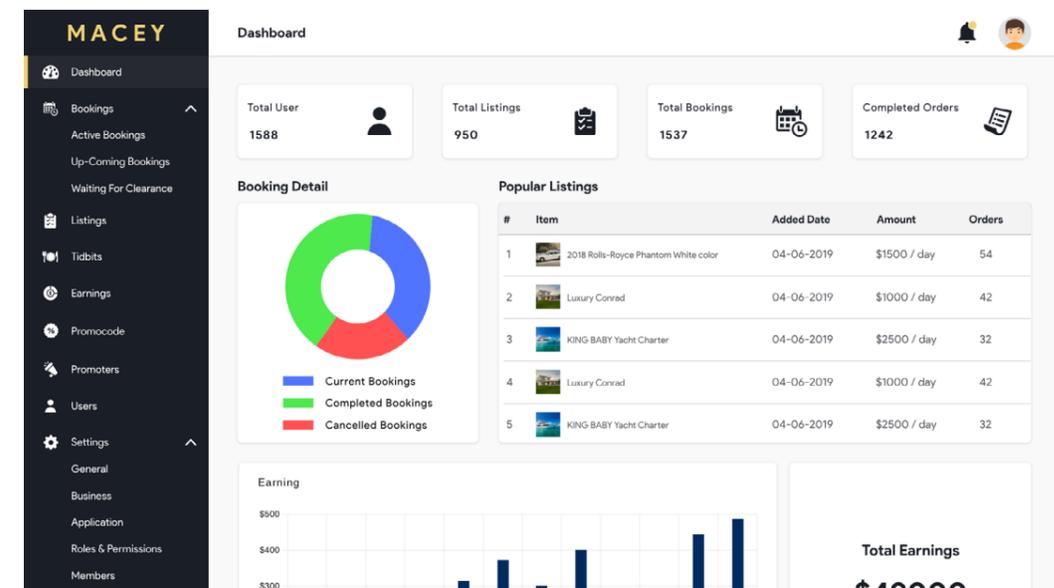

Description

KishanCooling is Urban Claps clone where the client can request for AC, Refridferator & similar Repair & service. Register Provider will be assigned by admin & then provider visit the place, create estimate invoice, the client will pay, the provider will start work, the client will provide ratings.

This includes much more functionality like service on scheduled time, check provider availability, provider live tracking, etc...

I made REST API of it using Node-JS, MongoDB & made Admin panel using Angular.

MACEY

Project Name :
Macey

Category :
Car, Yacht & Home Booking

Online :
N/A

Description

Macey app is an online Car, Yacht & Home/Villa booking provider application in which client can add their car, yacht & home to provide on rent. It will approve & then other clients can book it. the application includes very big payment flow from admin side.

I made an Admin panel of this project in Angular.
